

FREEDOMIQ

THE INTELLIGENT PHONE SOLUTION

Hosted Virtual PBX

The Future of Communications...Now!

The Future of PBX Today!

Typical telephone industry costs indicate a savings of up to 40% with FreedomIQ!

Take your company to the next level while saving money over a traditional PBX system. With FreedomIQ, you pay only for the phones you use at the time you need them. It's infinitely scalable up or down so there's no need to "grow into" an expensive large system or discard a small system you've outgrown.

Easy to set up and use, FreedomIQ offers more features and functionality than a traditional PBX but requires no maintenance technician. It's so effortless, anyone can control system settings, add phones and get the newest features the moment they're available. Your system never becomes obsolete like expensive hardwired systems.

The Ultimate Business Communications Tool!

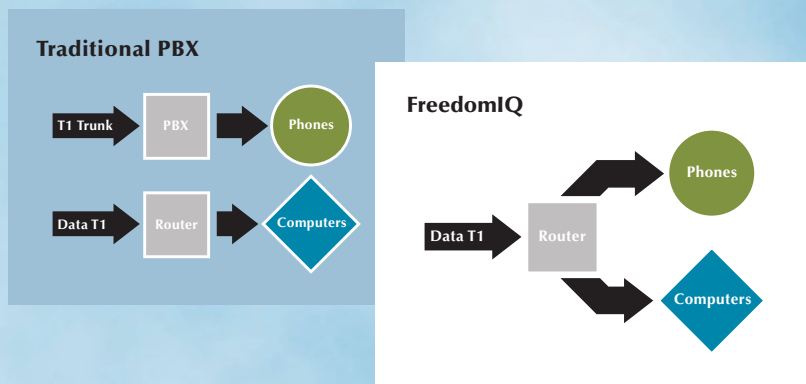

FreedomIQ Keeps You Connected!

Any Phone, Anywhere in the World!

- Infinitely scalable! Grows with your business.
- No large upfront infrastructure costs.
- Save on equipment, phone lines and maintenance.
- Calls can be routed to any phone, of any type, rather than only to a phone physically wired to an in-office PBX.
- Enjoy more business enhancing features than you would with a traditional phone system.
- Instant availability of newest features. Always up-to-date.
- Easy to set up and use. No technician needed.
- Instantly add seats and phones.
- Manage your business anywhere with your WebLINK Internet Control Panel.

Eliminate the High Cost of Trunk Lines!

FreedomIQ data lines carry
phone and computer connectivity!
